Last date of submission of application: 9th Nov. 2026

Plantation crops such as coconut, arecanut and cocoa play a pivotal role in India's agricultural and rural economy. However, emerging pests, diseases, invasive species and climate change pose new challenges to productivity of these crops. This 5 days training programme aims to equip research ers extension personnel, field officers and other stakeholders with the latest knowledge and hands on skills in modern and sustainable plant management in plantation crops.

Training Modules and Hands-on Components

- ✓ Climate Smart Approaches to Integrated Pest and Disease Management
- ✓ Emerging and Invasive Pests: Biosecurity and Early Warning
- ✓ AI, Digital Plant Health and Precision Surveillance
- ✓ Advanced Diagnostics and Disease Detection
- ✓ Emerging Biocontrol Technologies
- ✓ Smart Agrotechniques for Sustainable Production

Training Objectives

- Strengthen understanding of plant health management principles in plantation crops.
- Develop skills in diagnosis, monitoring, and management of major pest and diseases
- Promote integrated and eco-friendly pest and disease management approaches

Training Highlights

- Expert lectures
- Field visits and demonstrations
- Extensive hands-on sessions
- Interactive discussions
- Training materials
- Certificate of participation

Who Can Join

Researchers,
field extension officers,
plantation managers,
students, FPOs,
entrepreneurs, KVK staff, and
progressive farmers
