**Sub: - Nomination of officers for the training program at NIPHM, Hyderabad – reg.**

Dear Sir/ Madam,

NIPHM, an Autonomous Organization under Ministry of Agriculture & Farmers Welfare, Government of India, aims to promote Plant Health Management bio intensive approaches to minimize the indiscriminate use of pesticides. Soil and Water are the two important natural resources which maintain the Plant Health. Efficient utilization of water is a challenging job in agriculture sector as the irrigation is the major source of consumption. Water management and use of recycled water in agriculture shall be a big task in front of agriculture community to meet the demand of irrigation water and to produce food to feed the population with efficient use of water resources.

Micro-irrigation is thought to "save" water and boost crop yields. It added that savings from using micro-irrigation systems like drip and sprinklers are enormous water use, less fertilizer use and energy savings. In India, only 7.73 million hectares is under micro irrigation, compared to a potential 69.5 million hectares.

An efficient water management by using technology allows optimum use of available water and proper selecting of farm equipment helps in improving efficiency of the input in agriculture.

Advanced irrigation technology such as micro irrigation, water harvesting structures, percolating ponds and recycling of waste water helps to make good agricultural water management practices. Keeping this in view, NIPHM has proposed to organize the following training programme under Plant Health Engineering division at NIPHM, Hyderabad.

| S. No. | Training course                  | Duration (days) | From       | To         |
|--------|----------------------------------|-----------------|------------|------------|
| 1.     | Efficient use of Water resources | 3               | 14.10.2019 | 16.10.2019 |

This training will help officers to provide advice to farmers for better agricultural practices for irrigation on the soil and crop.

Therefore, it is requested to kindly nominate 2-3 suitable officers for the above mentioned training programme.
